

Introducing ScansonicHD's new M Series

SCANSONIC **HD**

ScansonicHD is proud to announce its new M Series of high-performance loudspeakers, designed to deliver true audiophile sound without the high-end price tag. The lineup features three models:

- **M15.2:** A 2-way standmount with a ribbon tweeter, 6.5" mid-bass driver, and rear-facing 5×9" passive radiator for impressive low-frequency depth. EUR 1.500 for the pair.
- **M20.2:** A 2.5-way floorstander with a ribbon tweeter, 2 × 5.25" mid-bass drivers, and dual 5×9" rear passive radiators, offering room-filling sound and precise imaging. EUR 2.600 for the pair.
- **M30.2:** A 3-way flagship floorstander equipped with a ribbon tweeter, 2 × 6.5" bass drivers, and dual 5×9" rear passive radiators for powerful, detailed performance. EUR 3.500 for the pair.

Key Features

1. **Ribbon Tweeter**
Ultra-low mass design for exceptionally detailed, airy highs and swift transient response.
2. **Rear-Facing Passive Radiators**
Eliminates port noise and ensures tighter, controlled bass across diverse room environments.
3. **Advanced 4-Material Cones**
Balances strength, rigidity, and internal damping to deliver accurate, distortion-free mid and low frequencies.
4. **Premium Crossover Components**
High-end capacitors, inductors, and resistors typically found in more expensive speakers, ensuring clear phase alignment and minimal signal loss.

A recent show attendee mistook the M Series for a EUR 20,000 speaker due to its performance. The reality? These speakers start at only EUR 2,600 per pair. Discover world-class Danish design and engineering at an unbeatable value.

All models are available in black and white satin gloss finish from April 2025.
